

See things as they are

A
Shit starts rats go to
Pines grow and die
Come over here sit by my side
Let's see things as they are

2/8

Winds cold suns small
Is there something behind at all
Why should we assume so?
Let's see things as they are

They are here let us see

Well they will make a sound
When you bang them around
They are in the way
and are there

~~and let us see and they are~~
~~and they have the size and shape~~

What is this? If they don't describe
they're still there in the night and you can't explain them away
Thoughts think cats dump

What stays or resides what looks to
lets take a look and what is it

Let's see things as they are
It's hard to know the things they are

People grope and pull folks
help another Tell jokes

There's no end to what comes
Let's see things as they are
