

# Who Did I Write To?

David Chadwick 6/26/01

E            A E            A /g  
Now tell me who did I write to?            *Chorus*  
                 D                            A E  
When I        went and wrote that letter.  
                 A            E            F#m  
I addressed        it dear to you.  
   E            A  
And it's the best that I could do.

                 E                            A  
Did I write it to your head? -- Did I write it to your heart?  
                 E                            D                            E  
To your memory your bed? -- To your shadow to your star?  
                 A            E                            A            E7  
Tell me who who who did I write to.

*[Chorus]*

                 E                            A  
Did I write it to your face? -- Did I write it to your smile?  
                 E                            D                            E  
To your hidden private place? -- To your thought stream, to your wiles?  
                 A            E                            A            E7  
Now tell me who who who did I write to?

*[Chorus]                    [instrumental verse and chorus]*

                 E                            A  
Did I write it to your fingers? -- Did I write it to your toes?  
                 E                            D                            E  
To your odyssey your goddess she? -- Your doppelganger soul?  
                 A            E                            A            E7  
Now tell me who who who did I write to.

*[Chorus]*
