

Our buildings may be lovely and tall and straight  
but ~~take a look~~ they are crumbling & we are ~~trouble~~  
Everywhere & go on ~~signs of~~ <sup>new</sup>  
~~Could it be we overbuilt and merely underused~~

~~Blazes~~  
~~the Name~~ in glad I came  
Glad that you came too  
We know that there is danger  
in everything we do  
But ~~that's~~ getting ridiculous <sup>but I had to do something</sup>  
and I hate to be a prole <sup>was we can do</sup>

I stood outside on the sidewalks New York the U.S.  
Indians Arabs Cubans Russians  
Chinese and my friends  
Diplomats from all over talking about wars & weapons  
people don't understand that it's gotten out of hand  
I guess they think it's still a world where <sup>they</sup> someone <sup>is</sup> getting

we stood there with our pockets and cried  
Dolphin you know could be anything <sup>as they water</sup>  
The cure is beyond security <sup>with how</sup>  
Can't we agree on one thing and <sup>the defense has cancer you know</sup> <sup>is</sup>  
I won't <sup>belittle</sup> ~~argue~~ with anyone who can talk about this at all <sup>our</sup>

~~Why~~ Now each has their own destruction  
Each has their tragedy  
Each ~~has~~ of us has burdens  
and none can be free of these  
But we've built ourselves a monster  
that surely ~~loves to eat~~ We've created a disease  
and he will ~~eat~~ <sup>eat</sup> us. Is there any medicine  
For this ghastly epidemic.

Isn't there something we can do?  
Went to a meeting at the storefront  
with <sup>some</sup> regular neighborhood folks  
We drank coffee ~~and talked~~ talked politics  
scratched ourselves & told some jokes  
The meeting came to order  
and then we ~~we~~ got to the problems we share  
We drafted a resolution  
and read it in despair  
Isn't there something we can do ~~of~~

~~a family on the corner was.~~  
We went out to the neighborhood  
and called to the people there  
Folks we have decided  
That ~~we~~ we've gotta have our share  
Our share of work our share of goods  
Our share of troubles &  
But also our share in governing  
which goes to those who move

~~Oh~~ We all marched down to City Hall  
~~The Mayor, ~~and~~ came~~  
Though we knew we were confused  
The Mayor came to say hi & name  
The Press did what they do  
~~we~~ We hassled with the press  
and when the day was through  
we grabbed each other sobbing  
at the table we had ~~to~~ set ourselves to.

3  
Darn you know could be any day  
That those big hot winds ~~will~~ blow (4X)  
Isn't there something we can do (4X)  
Can't we agree on this? (4X)  
Can't we all agree? Here's something we can agree on.  
It's something to do It's a challenge  
If you don't wanna go the wrong way up a street  
~~up a street~~  
Don't mean you gotta drive in no wall  
We must learn a new strength  
No foolin' - Don't need no weapons  
Don't need no schoolin'

I s it good psychology to arm up to the fall  
Isn't it a bad defence that counts suicide  
~~Isn't it a bad defence that counts suicide~~  
How could we get ~~reassured~~  
From insanity  
I don't think they want to get along  
Commercial interests serve profit  
Profit buys the ads  
We see the ads we vote profit (Wans)  
People lose profits bought the whole stage  
Profits got us. People serve the profit of others  
and ultimately profits profits and profits profits of profits  
The false god ~~has~~ has been served and the  
ending is doom [white hand profit]
