

Oct. 77 It Was You

CH7

Close my eyes what do I see
Oh my dear it felt to be
What do you think I see? What do you think I see?
Yes it was you who came to me.

Open my front door to find
Someone who's my heart's delight
Who do you think came in; who do you think came in
Yes it was you my lady friend,

Open my door to anybody within reasonable bounds
But been with someone like for instance you
Is known everybody in town (repeat)
and who when the rings cleared did I wake it out to be
Yes it was you who has hurt me

Roll over in the night - who's that lying by my side
Take a guess who it could be; take a guess who it could be
Yes it was you who lay by me

(whistle)
I'm always wondering why's going happen when we're dead + gone
But I saw when we cleaned up the party this morning
There'll be nothing more or less in after all or here before
and when I awoke from surgery who through the lens could I see
Yes it was you who came for me

a lovely walk down on the beach - there's a hand where my hand
was on the other end - who's hand can it be
Yes it was you who walked by me

- Oh what a lady - give me a huggal - you are a dear pal
this is love you love gal
when did you come from? who is this I see?
