

Someone new there's not much time / If you want to stay around

Like the good guy says when he's ~~off~~ the bad guy
Freeze
It's a homonym of what it does it ~~Freeze~~ II

Let's be cool and get off our knees

1 x ~~When we got to freeze we've got to freeze these weapons now~~
Maybe a giant refrigerator is what we need

2 x ~~Get the hell out of here~~ ~~seriously~~ now let's roll up our sleeves
That was a time in history when we ~~proposed~~ what we could do
Now we've got to freeze we've got to freeze these weapons now

3 When the ~~facets~~ rose the world took them on
Now we're all got to stop the bombs

4 From the Soviet Union to the U.S.
Let's give it our all and do our best

5 Get off your ass + get off the duff
Come on baby show your stuff

6 ~~Then after the freeze~~ I know you have other things to do
But you'll have time to do them too

7 No matter who you are no matter what you think
This is the ultimate enemy

8 Every race every class every woman child or man
Stand up collectors it will burn your stamps

9 bombs are more scary than ~~our~~ ^{so called} foes
It's one system + away we go

10 So good fuck earth + go lucky folks
Then after the freeze there is so much more

11 there's a lot of spaces in this song (gives you time to
make up your mind or your own)

You take an icebox I'll get a reefer
We've gotta freeze we gotta freeze these things now
anyway some sort of refrigerator

Time we did in WWII
That was a time in history when we proved what
Now we've got to freeze we've got to freeze these things now we could do

Seriously now let's roll up our sleeves
Gonna take some effort to bring on the freeze
