They'll up + rise - will rise against us
2/82 Up + rise - up + rise - oh they'll up + rise - will rise against us
Not so far away as South America
Folks down there been makin' quite a fuss
They're tryin' to shake the yoke
Like the patriots of old
And they'll up + rise - will rise against us.
It's been happenin' throughout history all the world
Of learnin' for our life style here they're hard enough
They've learned that they can beat
Big Goliath to retreat
And they'll up + rise - will rise against us
We can move now from our interests quite as well
We would act the same from selfishness or love
As human rights
We will either live for all or die
Or were sorry to take that fall
When they up + rise - will rise against us
There's respect and there is fear and there is
There's been big and bad and just deserts
But if we don't get tough and strong + tough
Let us then not be like fools who count the low
Regardless then as less and try to lift them up
But more like neighbors and adults let us
Our bodies + our minds and [illegible]
